

NEW RELEASE BRIT PRESS

SUSAN FAWCETT AND ALAN R. SMITH. 2021. **A Generic Classification of the Thelypteridaceae**. Sida, Botanical Miscellany 59 (ISSN: 0883-1475; ISBN-13: 978-1-889878-68-3, flex-binding). Botanical Research Institute of Texas Press, 1700 University Dr., Fort Worth, Texas 76107-3400, U.S.A. (**Orders:** shop.brit.org, orders@brit.org, 1-817-332-4441). \$25.00 US, 112 pp., color photos, illustrations, references, index, 7" × 10".

From the Publisher: *A Generic Classification of the Thelypteridaceae* is a book that represents a major taxonomic revision involving the recircumscription of 14 genera, descriptions of four new genera and three subgenera, and 172 new nomenclatural combinations. A unified classification of the Thelypteridaceae has eluded pteridologists for decades. As the result of detailed morphological study, and with the benefit of a large phylogenomic dataset, a comprehensive classification for one of the largest fern families is now available.

About the Authors

Susan Fawcett is a National Geographic Explorer and Research Botanist at the University and Jepson Herbaria at UC Berkeley. The Systematics of the Thelypteridaceae was the focus of her doctoral dissertation, completed at the University of Vermont. She is broadly interested in systematics and floristics, with an emphasis on ferns.

Alan R. Smith is a Research Botanist (now *Emeritus*) in the University Herbarium at UC Berkeley, a position he has held since 1969. In 2014, he received the Asa Gray Award from the American Society of Plant Taxonomists. Identification of ferns and lycophytes worldwide has been his passion, and he continues curatorial and research activities in retirement, collaborating with colleagues throughout the world.
