INDEX TO 27 TITLES WITH 79 AUTHORS
VOLUME 17 (2023)

We know you have a choice.

Thank you for choosing and supporting *Journal of the Botanical Research Institute of Texas*.

- A floristic inventory of vascular plants growing wild in the Naples Botanical Garden and on immediately adjacent land (Collier County) Florida, U.S.A. by George J. Wilder and Jean M. McCollom **17(2):487**
- A revision of Cordiaceae (Boraginales) in Central America, Mexico, and the United States by James S. Miller **17(1):39**
- Agrostis swalalohos** (Poaceae), a grass endemic to the mountains of northwest Oregon, U.S.A. by Nick Otting and Barbara L. Wilson **17(1):9**
- Botanical inventory and conservation assessment of Siempre Verde Reserve, Imbabura Province, Ecuador by Ronald L. Jones, Álvaro J. Pérez, Alex Reynolds, and Grady L. Webstert **17(2):457**
- Chromosomal observations on **Eliea** (Hypericaceae), a monospecific Madagascar endemic by Frank Almeda and Ricardo Pacifico **17(1):265**
- Cortinarius watsonae**, a new species of Agaricomycetes (Cortinariaceae) from the Gulf States by David P. Lewis, Joseph F. Ammirati, Kare Liimatainen & Tuula Niskanen, Clark L. Ovrebo, Matthew E. Smith, Jay Justice, and Laurel Kaminsky **17(1):259**
- Diversity across the border: Genetic study of a highly disjunct occurrence of the U.S. federally-endangered plant species **Physaria thamnophila** (Zapata bladderpod) discovered in Mexico by Brian E. Sedio, Ryan J. Williams, Dana M. Price, Christopher F. Best, Alberto Contreras-Arquieta, James R. Manhart, and Alan E. Pepper **17(2):413**
- Flora of six Lower Mississippi River islands (U.S.A.) by Grace L. McCartha, Caitlyn M. Sims, Brendan J. Kosnik, J. Richard Abbott, Mathew L. Jones, Ben E. Benton, Scott A. Mangan, and Travis D. Marsico **17(1):281**
- Geocarpon minimum** (Caryophyllaceae), new to Oklahoma, U.S.A. by Amy K. Buthod and Lisa Miller **17(2):535**
- Lythrum nieuwandlii** (Lythraceae), a new name for **L. cordifolium**, nom. illeg., a rare species endemic to Florida, U.S.A. by Alan R. Franck and Colleen Werner **17(1):31**
- Microlicia crenatifolia** (Melastomataceae), a new species from the westernmost limits of the Diamantina Plateau, Minas Gerais, Brazil by Ricardo Pacifico and Frank Almeda **17(2):439**
- New combinations for the flora of Nevada, U.S.A. by Arnold Tiehm **17(1):21**
- New combinations in **Asarum** (Aristolochiaceae) for two recently described **Hexastylis** species by Alvin R. Diamond **17(2):427**
- Noteworthy new angiosperm plant distribution records for New Mexico and Colorado, U.S.A. by Zachary S. Rogers, Sara Fuentes-Soriano, and Richard Spellenberg **17(1):323**
- Oreocarya worthingtonii** (Boraginaceae): A new species from southeastern New Mexico, U.S.A. by Robert Craig Sivinski **17(1):1**
- Preliminary vegetational changes in frequently burned and unburned upland pine-hardwood forests at Cook's Branch Conservancy in Montgomery County, Texas, U.S.A. by Eric Keith, Jesse Blum, and Sarah Mitchell **17(1):339**
- Reinterpretation of the mid-Cretaceous fossil flower **Endobenthos paleosum** as a capitar, unisexual inflorescence of Proteaceae by Kenton L. Chambers and George O. Poinar, Jr. **17(2):449**
- Seed banks of rare **Physostegia correllii** (Lamiaceae) in Lady Bird Lake, Austin, Texas, U.S.A. by Beth Middleton and Casey R. Williams **17(1):363**
