

BOOK NOTICE

SABEEHA S. MERCHANT, KEIKO U. TORII, & DOLF WEIJERS. 2026. **Annual Review of Plant Biology, Volume 77.** (ISSN: 1543-5008, ISBN-13: 978-0-8243-0676-2, hbk). Annual Reviews, Inc., 1875 Grant Street, Suite 700, San Mateo, California 94402, U.S.A. (**Orders:** annualreviews.org, science@annualreviews.org). Price not given, 731 pp., 9.5" × 7.5".

The *Annual Review of Plant Biology*, in publication since 1950, covers the significant developments in the field of plant biology, including biochemistry and biosynthesis, genetics, genomics and molecular biology, cell differentiation, tissue, organ and whole plant events, acclimation and adaptation, and methods and model organisms.

Contents of Volume 77

The Power of Symbiosis in Life and Science—*Eva Kondorosi*

γ-Aminobutyric Acid (GABA): Metabolite, Messenger, and Mediator of Stress Adaptation—*Bo Xu, A. Harvey Millar and Matthew Gilliham*

Metabolism, Perception, and Functions of Inositol (Pyro)Phosphates in Plants—*Ricardo F.H. Giehl and Gabriel Schaaf*

Pyrenoid Structure, Function, Evolution, and Characterization Across Diverse Lineages—*James Barrett, Onyou Nam, Mihris I.S. Naduthodi and Luke C.M. Mackinder*

Subcellular Lipid Trafficking and Membrane Specialization in Plants—*Cailin N. Smith, Tegan M. Haslam, Ivo Feussner and Rebecca L. Roston*
The Structure and Function of the Chloroplast Import Apparatus—*Zeyu Jin and Zhen Yan*

The Loss-and-Gain Strategy for Functional Specialization of Plant-Specific RNA Polymerases—*Xiaoxian Wu, Kun Huang, Hongwei Zhang, Shuyi Sun, Zhanxi Gu, Hong Sun, Yuxiang Zhang, Xujiao Liu, Wenhui Mu, Weiyang Xu and Yu Zhang*

A Multidimensional View of Biomolecular Condensates in Plant Biology—*Yansong Miao, Yanning Wang, Eden Vina Lamoste Grate and Xiaofeng Fang*

Extracellular Vesicles and Extracellular RNAs in Plant–Microbe Interactions—*Benjamin L. Koch, Meenu Singla-Rastogi and Roger W. Innes*

m6A RNA Methylation in Plants: From Molecular Insights to Applications—*Peizhe Song, Zhihe Cai and Guifang Jia*

RNA Meets Agriculture: From Molecular Mechanisms to Market Applications—*Veli Vural Uslu, Athanasios Dalakouras, Lina Sueselbeck and Aline Koch*

Structural Insights into Plant Hormone-Sensing Mechanisms—*Sun Hyun Chang, Malathy Palayam, Katherine A. Hand and Nitzan Shabek*

RAF-Like Protein Kinases in Plants—*Pengcheng Wang, Jian-Kang Zhu and Zhen Lin*

Spatial Regulation of the Plant Circadian Clock—*Ho-Wei Wu and James C.W. Locke*

The Genetic Basis and Domestication of Root System Architecture in Cereals—*Frank Hochholdinger and Peng Yu*

Gravity Sensing for Gravitropism—*Miyao Terao Morita, Takeshi Nishimura and Hiromasa Shikata*

Development, Anatomy, and Integrated Function of Grass Leaf Veins and Graminoid Stomata—*Alec S. Baird and Michael T. Raissig*

Genomic and Molecular Bases of Pollination Syndrome Evolution—*Tianyu Cui and Yao-Wu Yuan*

Long-Range Signals Built upon Plant Structural Continuity—*Hiraku Suda, Takuma Hagihara, Satoshi Ogawa, Kazuo Ebine, Masayoshi Nakamura and Masatsugu Toyota*

Sensing Plant Photosynthesis Using Solar-Induced Chlorophyll Fluorescence: From Chloroplasts to the Globe—*Xi Yang, Kaiyu Guan, Min Chen, Jennifer E. Johnson, Rong Li, Hyungsuk Kimm, Genghong Wu, Jongmin Kim, Hamid Dashti, Sheng Wang, Manuel Lerdau, Christian Frankenberg and Joseph A. Berry*

Cryo-Electron Tomography in Plant Biology—*Coral Martinez-Martinez, Hong Zhan, Trevor H. Moser and Marisa S. Otegui*

Chemical Probes for Functional Plant Imaging—*Maarten Besten, Anna Daamen, Matyas Fendrych, Jan Willem Borst and Joris Sprakel*

Computational Modeling of Plant Roots: Development Meets Physiology and Adaptation—*J.A. Saccheri and Kirsten ten Tusscher*

In Vivo Monitoring of Energy Metabolism with Genetically Encoded Fluorescent Biosensors—*Jan-Ole Niemeier, Pedro Barreto, Bruce Morgan and Markus Schwarzländer*

NAD Modification at the Battlefield in Plant–Pathogen Interactions—*He Zhao, Lena S. Knorr, Attilio Pascucci, Wenbo Ma and Michelle T. Hulin*

Plant Phenotypic Plasticity: From Molecular Mechanisms to Breeding and Climate Change Adaptation—*René Schneider, Isabel Bäurle, Zoran Nikoloski and Michael Lenhard*
